WHO ARE WE

We are H&A Real Estates

- We are dedicated to uncovering hidden value in the complex Seattle real estate market.
- We focus on the exclusively rich 0.1% of clients
- They don't want a "good house"; they want an "asset anomaly."
- Our Guiding Principle is: **'Where luxury leaves logic behind'**

WHO IS OUR CLIENT

Our Client is Jacob Phillips

- A buyer with an **unlimited budget**, who is in **no** need for a **waterfront**, rather he is interested in a **big lot** to place a golf course, a tennis court or at least a pool.
- He needs either **4 or more bathrooms** or he wants that **his house is bigger than the neighbor houses**.
- Working with clients like Jacob Phillips requires us to look beyond the spreadsheet. We don't just sell square footage; we sell the space where their contradictions can coexist.

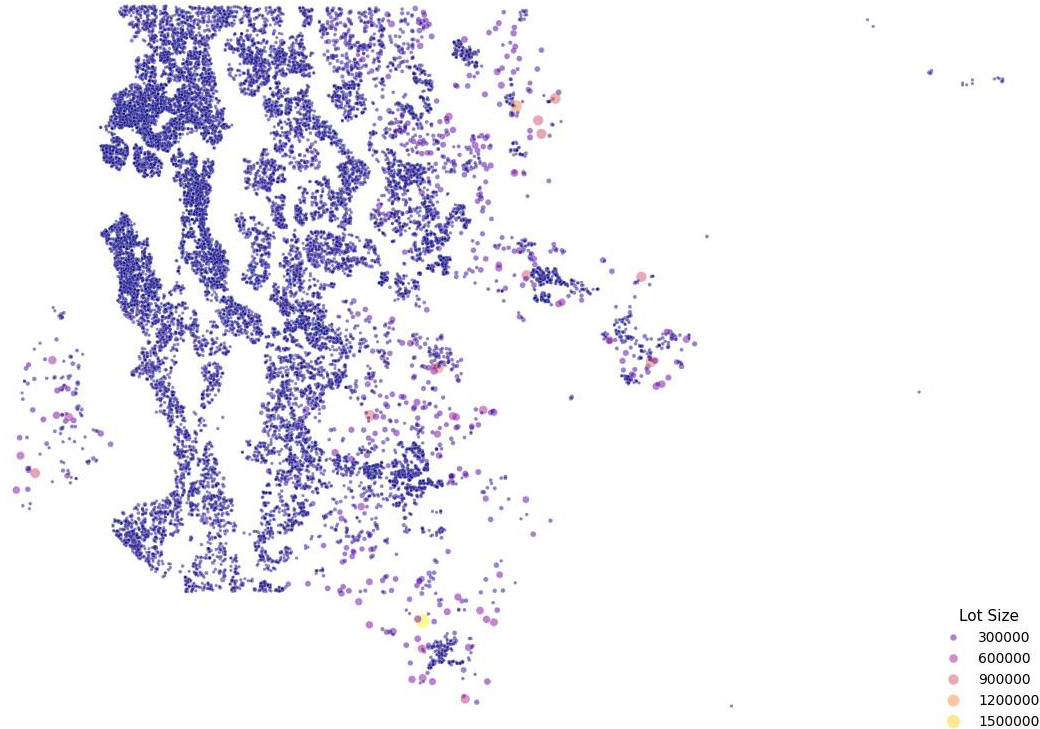

WHATS THE DATASET

We are working with the King County Housing Dataset with 21.613 entries.

This dataset includes info on:

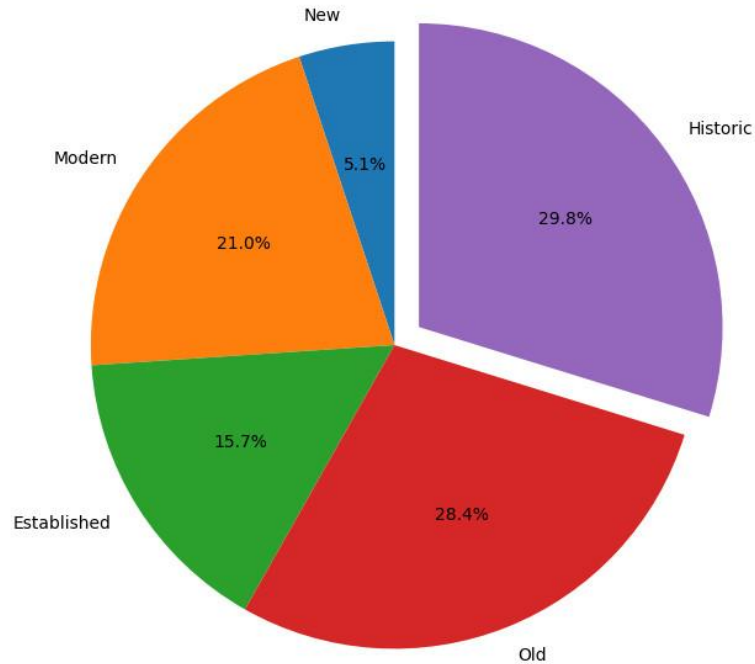

- Num of bedrooms & bathrooms & floors
- Size of lot, basement, living area
- Building and renovation year
- Exact position (lon, lat, zip code)
- Price, sale date, view, condition, grade
- Size of lot and living area of 15 nearby houses

THE KING COUNTY CONSTELLATION

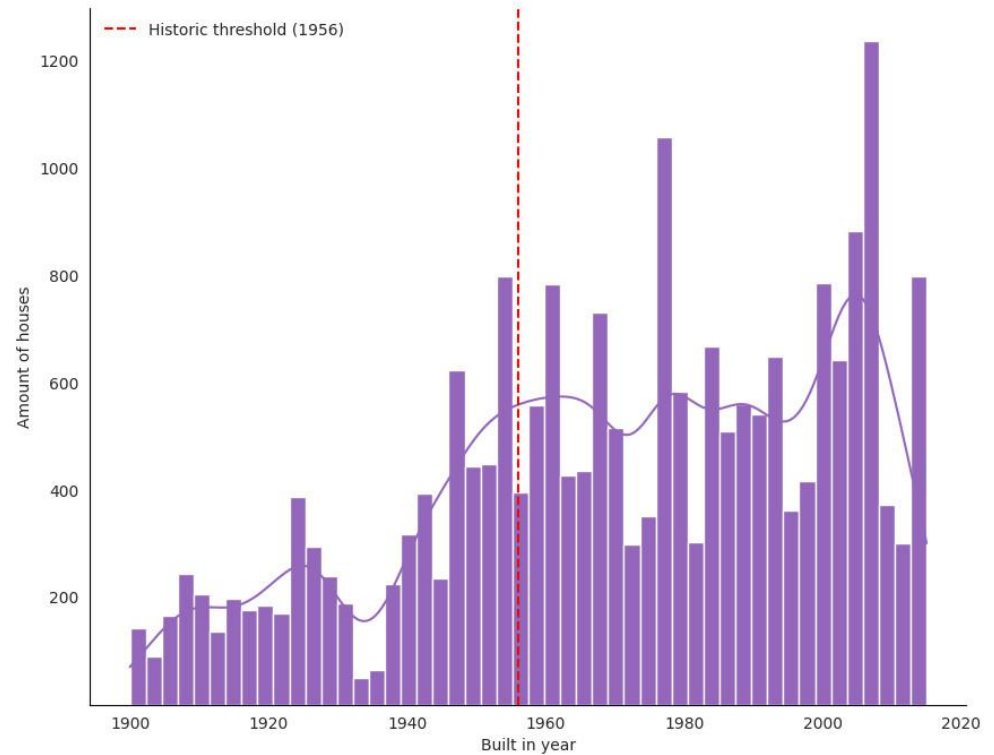

WHATS THE MARKET

Distribution of Houses by Age Category

Distribution of historic houses in King County

3 HYPOTHESES

HYPOTHESIS 1

Properties located at specific coordinates with no waterfront have smaller lot sizes.

HYPOTHESIS 2

Properties either having more than 4 bathrooms or a larger living area compared to nearby houses can be found in relatively good condition.

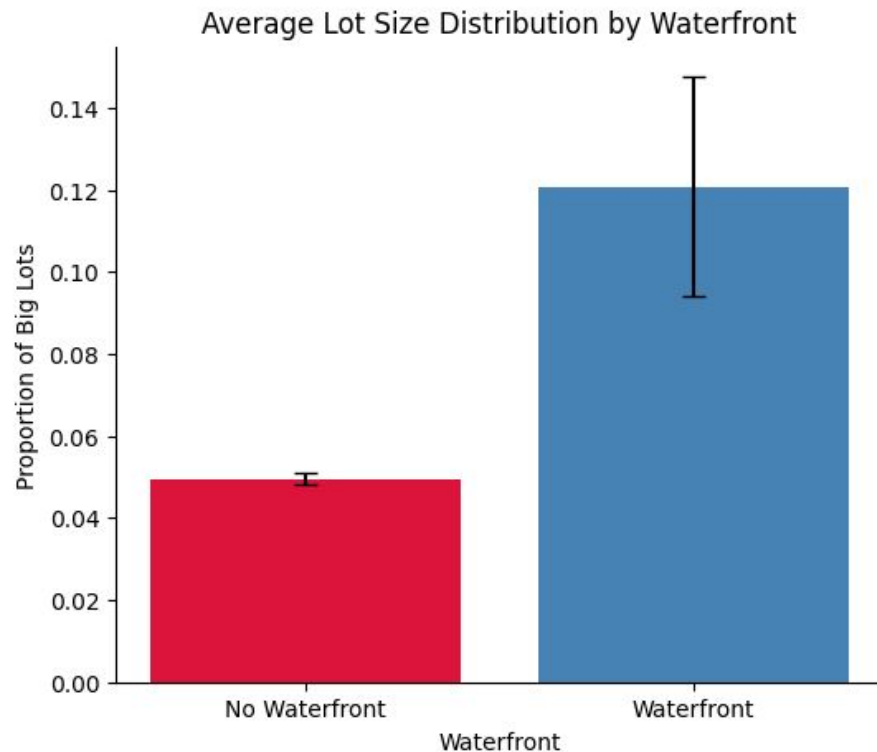

HYPOTHESIS 3

Historical houses in good condition are more likely not renovated.

HYPOTHESIS 1

Properties located at specific geographic coordinates (latitude and longitude) that are **NOT waterfront** are more likely to provide **smaller lot sizes**.

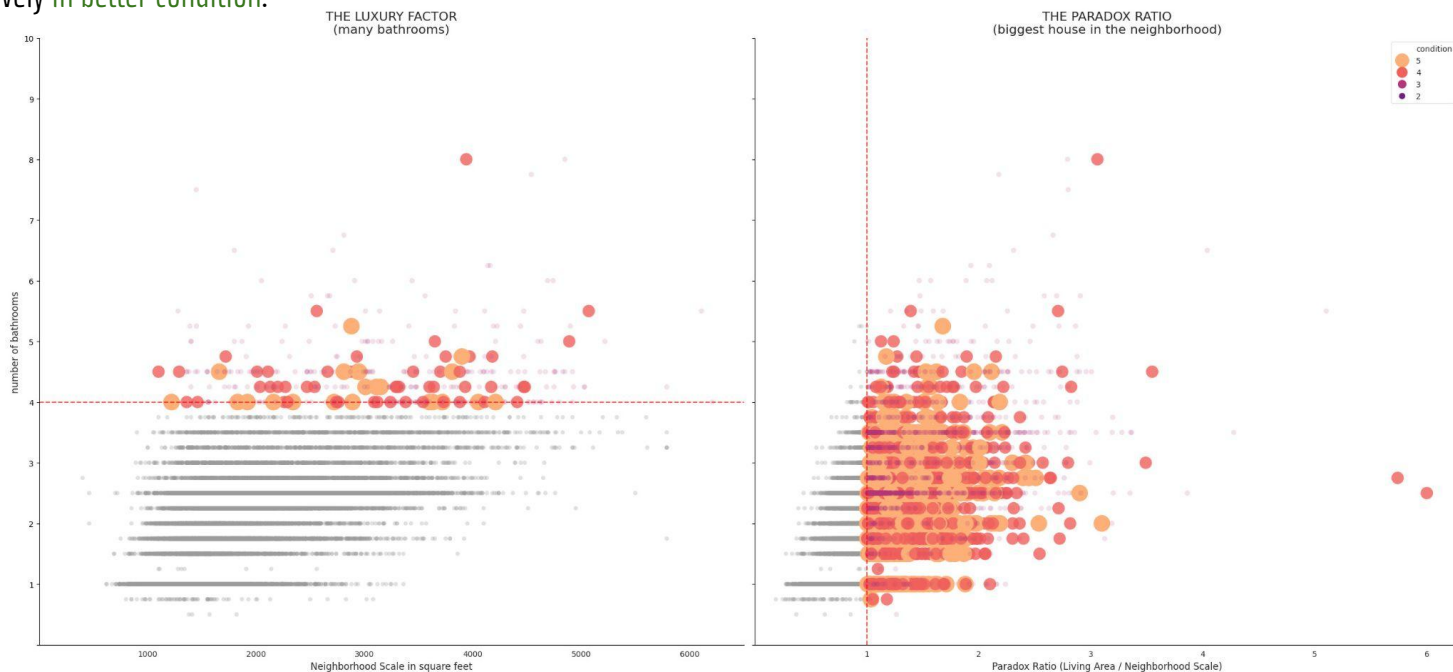

HYPOTHESIS 2

Properties that are characterized by either having at least

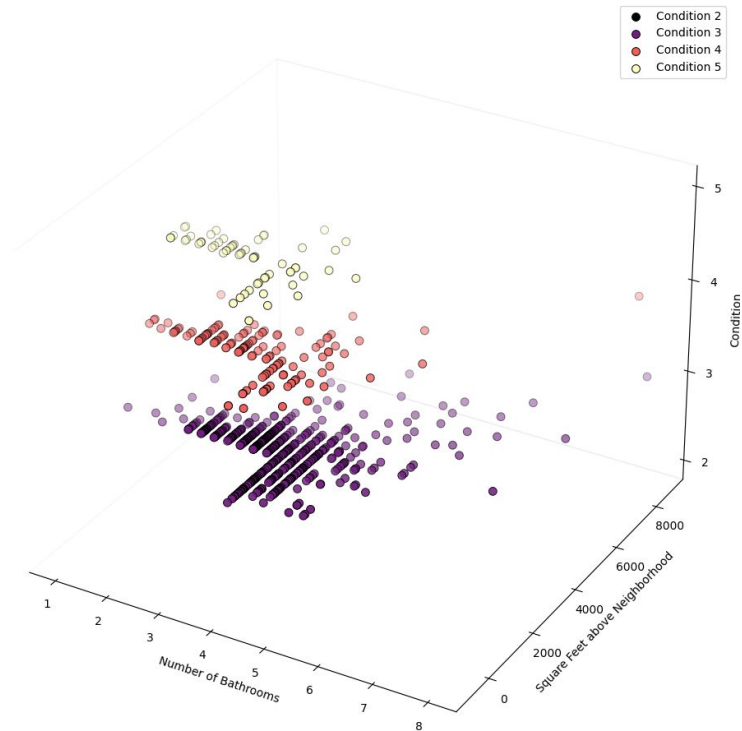

four bathrooms or having a larger living area than

neighboring properties are relatively in better condition.

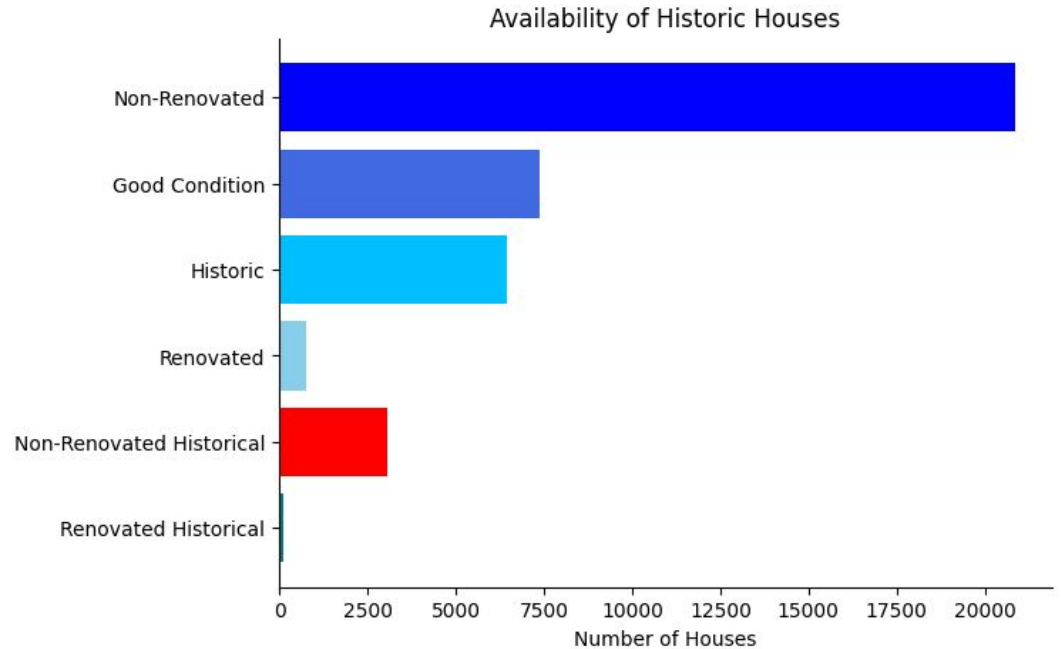

HYPOTHESIS 2

THE PARADOX FUSION
"Where luxury leaves logic behind"

HYPOTHESIS 3

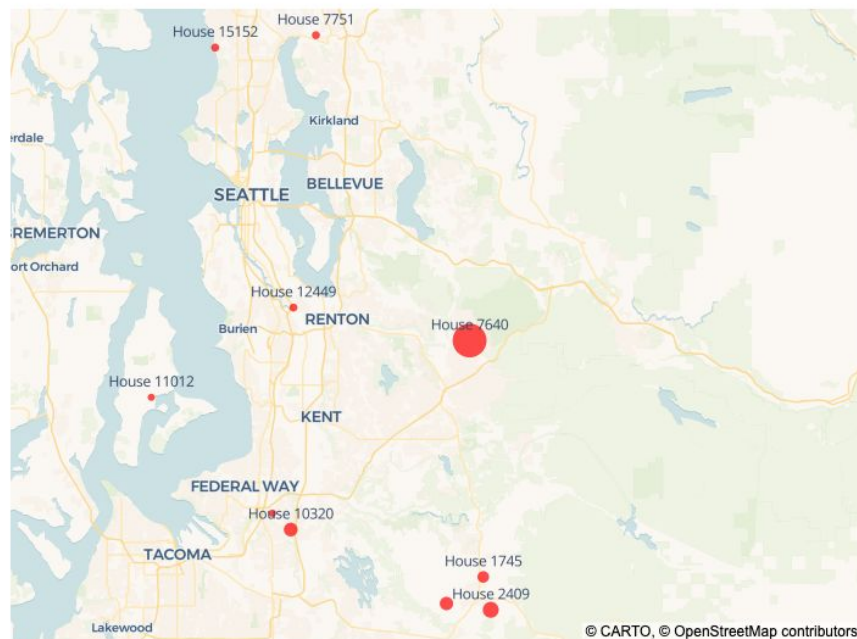

Properties that are **historically older** but in **good condition** are more likely to be in original format and **have not been renovated**, preserving their original architectural character.

TOP 10 RECOMMENDATIONS FOR JACOB (non-renovated)

Top 10 Client-Matching Non-Renovated Properties

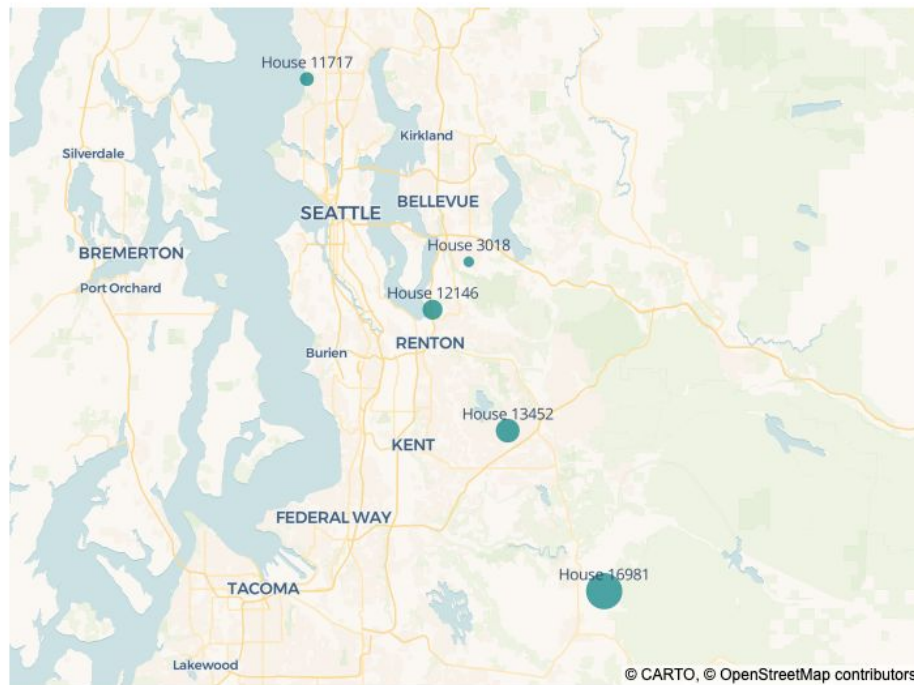

- Buyer
- Unlimited Budget
- 4+ bathrooms or smaller house nearby
- Big lot (tennis court & pool, golf)
- Historic
- No waterfront

TOP 5 RECOMMENDATIONS FOR JACOB (renovated)

Top Client-Matching Renovated Properties

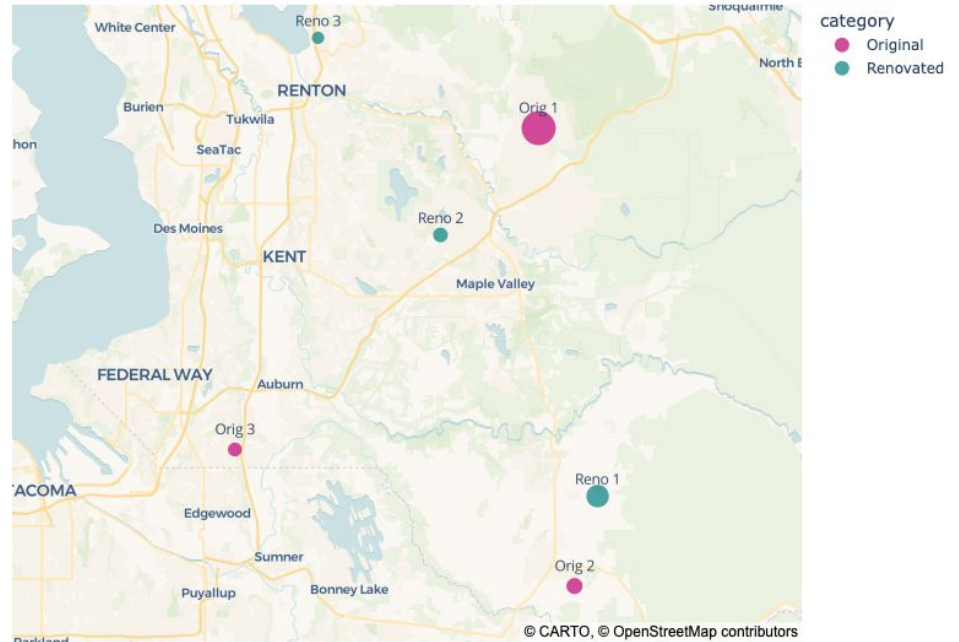

- Buyer
- Unlimited Budget
- 4+ bathrooms or smaller house nearby
- Big lot (tennis court & pool, golf)
- Historic
- No waterfront

TOP 3 RECOMMENDATIONS FOR JACOB

Top 3 Original vs Renovated Properties

- Buyer
- Unlimited Budget
- 4+ bathrooms or smaller house nearby
- Big lot (tennis court & pool, golf)
- Historic
- No waterfront

Thanks
